CBVMS | Major System Changes

September 1 - October 27, 2026 / GitHub-committed additions and improvements

01 Attendance recording and printable violation reports (Sep 18)
Added attendance records and printable violation reports. [3855cfd]

02 Student status and contact management (Sep 22)
Added enrollment-status controls, pending-registration verification, contact details, status history, and premises-entry records. [6e93de1]

03 Appeal submission and review workflow (Sep 25-Oct 1)
Expanded student appeals, supporting-image submissions, administrator alerts, decision history, and links to the original violation. [e1cd6ba]

04 Desktop interface redesign (Sep 26)
Refreshed the campus interface, welcome transitions, profile photos, workspace navigation, and startup behavior. [ca7990a]

05 Safer face enrollment and registration (Sep 26-Oct 2)
Improved capture validation, face-to-student association, preview responsiveness, and recovery from interrupted enrollment. [741ed9f]

06 Suspension management and analytics (Sep 26-Oct 7)
Added and refined suspension administration, lifting and history, student-record views, filters, trends, and analytics. [c9db5c4]

07 YOLOv8 monitoring improvements (Sep 28-Oct 23)
Improved person/torso association, uniform-assessment coordination, model safety, and readiness. Existing YOLOv8 models were retained. [b489989]

08 Face recognition and identity-tracking improvements (Sep 28-Oct 25)
Strengthened identity consistency, unknown-face handling, stale-result rejection, and recognition-gallery management using existing InsightFace/ArcFace. [7d04ae4]

09 Responsive monitoring and portal loading (Sep 28-30)
Separated background analysis and persistence from UI rendering; bounded frame queues and rejected outdated asynchronous portal responses. [dc13c9d]

10 Login and application lifecycle fixes (Sep 29-Oct 7)
Reduced login/workspace flicker and improved window transitions, worker cleanup, and application shutdown. [174c39f]

11 Evidence integrity and case ownership (Oct 1)
Added stronger original/supporting evidence association, SHA-256 integrity checks, and audit tooling to prevent mismatched case evidence. [6a528ac]

12 Connected student web portal (Oct 2)
Added browser access to student profiles, violations, appeals, notifications, and settings; improved discipline email notifications. [8b56418]

13 CSV reporting and roster handling (Oct 3-5)
Added CSV exports and refined reporting workflows; later added validated roster imports and spreadsheet-formula escaping. [3ffe355]

CBVMS | Major System Changes

September 1 - October 27, 2026 / GitHub-committed additions and improvements

14 Standard academic classifications (Oct 5)
Introduced a shared seven-college, 25-program catalog, dependent College/Course controls, separate year/section fields, and legacy-value preservation. [9f68e6f]

15 Campus-sighting attendance system (Oct 5)
Added immutable sighting events, daily summaries, camera/source details, cooldowns, duplicate protection, pagination, and filtered exports. [9f68e6f]

16 Password setup and session security (Oct 5)
Added mandatory first-login password setup, restricted sessions, credential revisions, persisted sessions, and PBKDF2-SHA256 password hashing. [9f68e6f]

17 Structured appeal decision categories (Oct 5)
Required decision categories and explanations; recorded them with administrator identity, timestamps, history, notifications, and discipline transitions. [9f68e6f]

18 Unknown-person sightings and detection audio (Oct 5-19)
Added unknown-sighting handling and UI improvements, plus prioritized detection sounds with bounded queues and cooldowns. [c9db5c4]

19 Supporting-image forensic review (Oct 6 / merged Oct 21)
Added background forensic jobs, metadata/container checks, optional C2PA provenance, and staff analysis history. Learned manipulation detection remains experimental. [244d680]

20 IP/USB camera support and freeze fixes (Oct 18-24)
Expanded IP-camera and Windows USB-camera handling; improved camera switching, reconnect behavior, and freeze diagnostics. [13fcdc7]

21 Cloud synchronization protocol v2 (Oct 20)
Added registered writer/source checks, publication generations, durable acknowledgments, evidence verification, credential-conflict checks, and reconciliation audits. [4292b11]

22 Academic calendars and semester enrollment (Oct 21)
Added published calendars, term-specific enrollment/history, and semester-aware attendance, violations, strikes, suspensions, reports, and cloud snapshot schema v3. [4b358ed]

23 Faster model preparation and diagnostics (Oct 23)
Started shared model warmup during login, reused model instances, removed redundant frame copies, and added bounded timing and benchmark tools. [b489989]

24 Semester-aware Reports workspace (Oct 24)
Added separate directory, enrollment, violation, suspension, and imported-history sections; multi-select filters, pagination, CSV/ZIP exports, and print/PDF output. [c7c6e28]

25 Cloudflare deployment and additive campus import (Oct 24)
Deployed the portal with Workers, D1, private R2, and PasswordCrypto; added five MacBook accounts, mapped case IDs, and verified evidence without replacing existing records. [d43ff56]

26 Superadmin Recycle Bin and restoration (Oct 25)
Added recycle/restore controls, lifecycle versions, audit records, durable cloud delivery, session revocation, and safeguards against stale reactivation. [338ad83]

Scope: main through commit 338ad83. Uncommitted incremental-sync work is excluded. YOLOv8 and InsightFace existed before September; no new major model version or tagged application-version change was found in this period.
